

VI. License Termination

Regulations: 180 NAC 3-017.02, 180 NAC 3-018.07, 180 NAC 3-019.04 and 3-019.10, 180 NAC 1-004.

Prior to license termination, the licensee must properly dispose of all licensed radioactive material possessed. The licensee will need to send a notification of disposition of the materials with a request for license termination before the expiration date. (See 180 NAC 3-019) NRH Form 60 "Certificate of Disposition of Materials" will need to be submitted.

If the licensee can not dispose of all the licensed radioactive material in possession before the expiration date, the licensee will need to submit a license renewal for storage only of the radioactive material. The renewal is necessary to avoid violating Agency regulations that do not allow the licensee to possess licensable material without a valid license.

The licensee must do the following:

- Notify the Agency, in writing, when a decision is made to permanently cease licensed activities.
- Certify the disposition of radioactive materials by submission of NRH Form 60, "Certificate of Disposition of Materials." (See Appendix U)
- Before a license is terminated, send the records important to decommissioning (as required by 180 NAC 3-018.07) to the Agency. If licensed activities are transferred or assigned in accordance with 180 NAC 3-017.02, transfer records important to decommissioning to the new licensee.
